

For this assignment, the task is to design a webpage with complex grid based image gallery along with a carousel on the top of the webpage (see the screenshot in the next page).

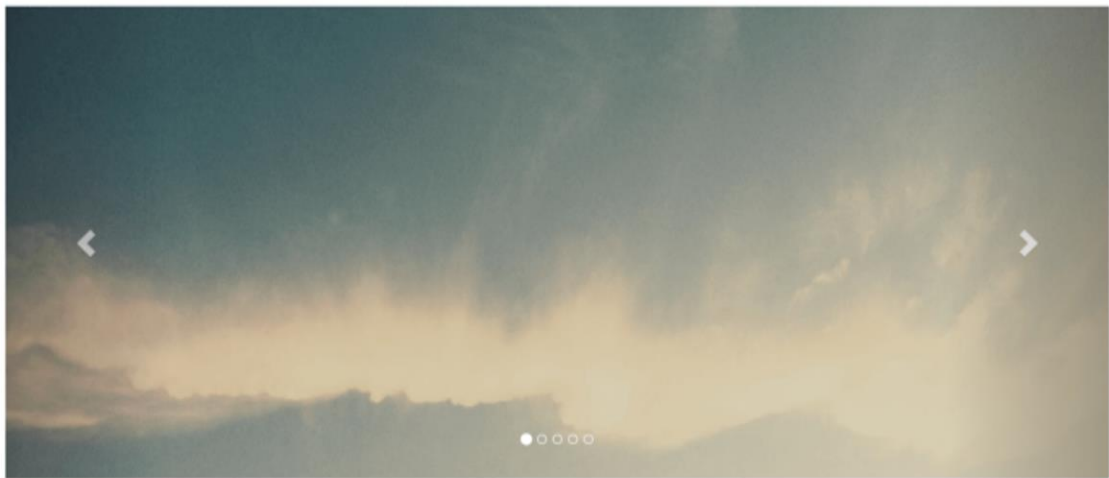

Deliverables:

- You can use your own images however the layout should be exactly the same as given in the screenshot.
- The layout should be responsive.
- The image tiles have a hover effect (see posted GIF in #ask-instructor) which you need to implement (the opacity is also animated).
