

In today's CC, create a signUp form as shown below for the specified route:

/signUp

Sign Up

Name

Email address

Password

Avatar Image

Choose File No file chosen

Submit

The form should accept name,email,password and avatar image from the user.

When the user clicks on submit button the user should go to another route with the following view:

/profile

User Profile

Name

John Doe

Email

johnDoe@jasper.info

The avatar image is the image uploaded by the user during the signUp stage.

Note:

- No html files should be present and use “**hbs**” file extension for the views.

Let me know if you have any doubts in **#ask_instructor** channel.
