

For today's CC, you need to display a multiplication table of a number like so in the browser console:

5	*	1	=	5
5	*	2	=	10
5	*	3	=	15
5	*	4	=	20
5	*	5	=	25
5	*	6	=	30
5	*	7	=	35
5	*	8	=	40
5	*	9	=	45
5	*	10	=	50

Requirements:

1. User will enter the number for which the multiplication table is to be shown (in this case it is 5).
2. User will also enter the limit till how much the table should be shown (in this case it is upto 10)
3. If the user does not provide any limit, it should default to 10.
