

In today's CC, first [download this dataset](#). After downloading write a node.js script which does the following:

1. Read the JSON file and insert all the data into MongoDB.
2. Insert 2 more documents into the same collection.
3. Update the document(s) where the the **userId** is 10 with any of your custom dummy texts.
4. Delete the document(s) where the **userId** is 1

Note:

- You can use local or Atlas based MongoDB.
- After each of the step do log in the console about the steps whether it has been successful or not.

Let me know if you have any doubts in **#ask_instructor** channel.
