

In today's CC, you need to design a form which will take two values "Number1" and "Number2" and display the sum of the two when the user clicks on the submit button (see the GIF in the #announcement channel).

**Sum Calculator**

Number 1

Number 2

42

Note:

- You have the freedom to style the form in anyway you like.
- The result (sum) should be displayed in the HTML and NOT in an alert box (using alert() function )
- No embedded JavaScript. Your JavaScript code should be written in a .js file and should be linked accordingly.
