Create a webpage having media player controls like below.

Mandatory Controls to be present:

1. Play/Pause button
2. Rewind/Forward button
3. Back/Skip button
4. Seek-bar with start time and end time.

Things to note:

- You don't have to put the functionality of a music player.
- Make sure your page does NOT look EXACTLY same as per above image. Use your own creativity.
- Make sure you use only external style sheets. No embedded/inline styles should be used.
