In today's CC, you need to fetch random dog image from the [Dog CEO API](#) and display it in the HTML. Also you need to use both the '.then() .catch()' & 'async await' method to fetch the data from the API. You should alternate between the two way internally in the code.

For ex, on the first click on the button fetch the data using 'async await', then on second click use '.then() .catch()' method. Then on 3rd click again use 'async await' and the cycle continues.

Welcome To Random Dog Pictures

Note:

- No embedded JavaScript. Your JavaScript code should be written in a .js file and should be linked accordingly.
- You can design the UI in any way you like.
- Also focus on code readability and proper approach along with usage of ES6 wherever possible.
